IRIS GARDENS

PLEASANT VALLEY, BUCKS CO., PA.

VIOLET HARMONY

A Large, Ruffled
Iris in a Beautiful
Violet Tone.

Winner of the
President's Cup
at the A. I. S.
Convention 1953.

EVERY GARDEN SHOULD HAVE SOME IRIS PLANTINGS

Bearded Iris are considered the ideal perennial. They are very hardy, quite easy to grow and practically free from diseases and insect pests.

The basic needs for best results are drainage, sun and a moderate amount of feeding. Iris cannot stand wet ground or standing water for a long period without rotting—hence a slight slope or raised beds are desirable. They may be planted in full sun or partial shade but in order to bloom well there should be at least a half a day of sun. Bone meal is the safest food and should be worked in the ground around the plants early in the spring. Superphosphate is quicker acting—should be kept away from rhizomes however. Well rotted cow manure is very good if worked into the ground well **before** planting and kept away from the rhizomes.

Iris are not particular about the soil—of course a light, well drained fertile garden soil is best but they will grow in sandy or clay soil. We have them growing equally well in slightly alkaline and slightly acid soil.

The range in color is more extensive than in any other flower and with the various blends, bi-colors, plicatas and variegatas, the variety to choose from is almost unlimited.

Iris not only give wonderful color value and added beauty to your garden, but are excellent as cut flowers for the house. A stalk, if cut when the top flower is opening, will last a week or longer.

Foreword

ANOTHER YEAR has rolled around and again it is our pleasure to greet old friends and customers and present you with this copy of our new catalog for 1956.

You will note that we have added a large number of new interesting varieties to our list which brings the number of different varieties being grown here to over four hundred. So, if we can avoid a reoccurrence of last year's late spring freeze, we should have the largest and finest Iris display that we have ever had to present to our visitors this season.

Your attention is called to the large number of Special Collections which we are offering this year. They range in price from \$4.00 to \$42.50 and all of them give exceptionally good value for the choice varieties which they contain. They also will make fine presents for a flower loving friend or relative—see bottom of page 39 for more on this subject.

We would like to express our thanks to our old customers for the fine orders they have given us, for recommending our Iris to their friends and for the many nice complimentary letters we have received from them. We will ever strive to do our utmost to merit this confidence.

You Are Cordially Invited to Pay Us a Visit

The garden gate is always open from early morning to dusk every day, including Sundays, during the blooming season. So if you live within driving distance, by all means pay us a visit—you will see a display of Iris, as well as perennials, peonies, flowering trees and shrubs in bloom which will make it very much worth the trip. Colored pictures and written descriptions are poor substitutes for actually seeing a clump of Iris in full bloom—only then can its beauty, charm and grace be fully appreciated.

The Blooming Period

At our location the early varieties commence blooming usually the middle of May and the late varieties finish blooming by mid-June. The BEST TIME to visit the gardens in order to see the most Iris in bloom is from May 20th to June 7th—the PEAK BLOOM period from May 27th to June 3rd. We are always about six days behind the Philadelphia area. The dates given are for a normal spring and we suggest that if you are in doubt, telephone us before coming — Tel. Springtown - Fieldbrook 6-7836.

Location

Our gardens are located one half mile west of Route 212 in upper Bucks County at Pleasant Valley; watch for the turn at the north end of the village. Our sign posts will guide you when nearing Pleasant Valley. See our new map showing the best routes and distances on Page 40.

Terms

Cash with order please—making checks or money orders payable to Cherry Hill Iris Gardens. Sorry, no C.O.D. shipments. We have no minimum but since postal charges are now so very high, we must ask that on all orders under \$4.00, customers include 50¢ additional to cover postage and packing charges. ALL other orders are shipped postpaid.

PLEASE NOTE *If You Visit Our Gardens During The Blooming Season, And We Hope That You Will, Kindly Bring This Catalog With You When You Come.*

Shipments

We will commence filling orders this year on July 10th and continue until October 15th. Please do not request shipment at any other time.

Proper Planting Time

This depends somewhat on location. For this latitude July to mid-September gives the best results, while further north July and August are recommended. For southern states, planting may be done as late as mid-October. The idea is to plant iris early enough so that they may be well rooted before winter sets in—this prevents winter and early spring heaving. Heaving does not kill iris but it will greatly lessen the chances of blooming the first year. Complete cultural instructions are enclosed in each shipment.

Guarantee

Every rhizome will be freshly dug, large, vigorous and well rooted. They will be free from disease and insect pests and packed with greatest of care so as to reach you in perfect condition. Every rhizome is labeled with a copper wired printed wooden label true to name. No substitutions are made unless you so indicate on your order blank. (We might add here that customers who permit substitutions are **always** the gainers.)

We will replace free any Iris that does not meet with your approval or does not grow after planting providing this is reported before October 15th. (Please do not ask us to replace Iris lost by winter-kill. We do not feel that we should be held responsible for the planting location, care or for growing conditions beyond our control.) In the event there is an error in labeling, mistake will be rectified with a double replacement the following season on report from you immediately after the blooming season.

Our gardens are licensed and inspected by the Penna. Dept. of Agriculture. All shipments to areas outside the Jap. Beetle Zone are inspected and stamped by the U. S. Dept. of Agriculture here at our gardens before shipment.

New Introductions for 1956

This year we have the pleasure of introducing an Iris by the well known and skillful hybridizer, the late Mr. H. F. Hall of Moorestown, New Jersey. Among his many fine creations are Coronation Red, Hyblaze, Radiant Red, Sunset Glow, Color Sergeant, Penn Charter and Patrician. The Iris which we are introducing is quite different from his others and according to his son, an Iris which his father considered to be one of his best seedlings. We have selected the appropriate name of

Petals of heavy substance on sturdy 38" stalks. Buds have a decided greenish cast. Blooms mid-season. Net \$15.00 each.

This year we also have the honor and privilege of offering a most promising new Amoena which Mr. C. W. Voris of Watstown, Penna., is introducing this year. It will be on display in both his garden and ours.

WATERLILY (Kleinsorge, '53) M. 34"

***WATERMELON (Waters, 1954) M. 38"**

Named because it is the color of the inside of a watermelon that is not quite ripe. Color is a blend of greenish light lemon and deep watermelon pink. A large ruffled flower of extra heavy substance. **NET \$15.00 each**

WEDDING BOUQUET (Buttrick, '52) M. 35"

There are many good whites but here is a new one which is extra good and quite distinctive. Caught every one's attention at the '53 National Convention and was Runner-Up for the President's Cup. IRIS FOR EVERY GARDEN

By Sydney B. Mitchell

The most up-to-date and complete book on Iris ever written with all basic information for amateurs and for specialists, an authentic discussion of species and varieties all over the world. With this book as guide you can select Irises to bloom from 3 to 12 months a year depending on where you live and what you plant—familiar bearded, the Japanese, Siberian, Louisiana types, or certain rare and fascinating species. Dr. Mitchell has grown Iris for 50 years, has himself developed new varieties, and shows you the way to special satisfaction with this "finest hardy perennial."

GRAY'S IRIS BORER ERADICATOR

Endorsed and used by leading Iris Growers

This solution is easily applied by spraying the Iris leaves — two applications during the growing season, means "sure death" to the borer. First application should be made early in the spring just after the Iris has started growth. Not expensive as two tablespoonsful makes one quart of spray. One quart makes 8¼ gallons of spray mixture. Complete directions are on label.

PERMARKERS

PERmanent MARKers For Plants

PERMARKERS, the new garden marker, meets **all** the exacting labeling requirements of discriminating gardeners and growers. They were designed after years of research and after testing all ordinary labels now on the market. We have used them for the past eight years.

The label is made of gray-green durable thick plastic. This label is most harmonizing in the garden. A special waterproof pencil is used. Writing remains legible for years but can be easily erased for re-use.

The supports are made of Bethanised steel which is light, rigid, durable and non-corrosive. They will not turn or heave and hold the labels firmly at a readable angle—never spattered and always clean. Labels easily removed from supports.

Postpaid prices are as follows:

WORDS OF PRAISE from our many visitors and kind letters from satisfied customers are a great source of satisfaction to us. We take pride in presenting below excerpts from a few letters recently received.

Your Iris arrived in fine shape. They are really beautiful specimens and much finer than those which I have had from other places. They are such fine roots that I feel sure they will bloom the first year. They will all have the required amount of sun, beds are well drained, and I think the soil mixture is just right.

I will never send farther than Cherry Hill for any more Iris. Thanks again for the gifts.

PENNSYLVANIA

When I visited your gardens with friends the other day, I resisted the urge to buy but you see what happened when I got home. Here is my order.

MARYLAND

The iris which I got from you two years ago have all done so well and I am very pleased—so are my neighbors.

PENNSYLVANIA

I visited your gardens several weeks ago and I was greatly impressed by the beauty. I am just starting my iris garden with this selection, hope to add to it every season. Will be anxiously awaiting my rhizomes, and more anxious for the flowers come next spring.

PENNSYLVANIA

The roots which I had from you last year, although planted late, all survived the winter splendidly, and all but Snow Flurry bloomed. Hit Parade did especially well, giving me three stalks of bloom, two coming from side shoots, something I have seldom seen. Thank you for the good service last year.

VERMONT

The Peacherinos arrived in perfect shape. We have never received such beautiful rhizomes. The roots were so plump. My brother remarked, "Mr. Holton knows how to grow iris."

CALIFORNIA

Your rhizomes are the best that I have gotten this year, with very fine root systems which I think are so essential to success and quite adaptation to the new soil location. Thanks again for the fine plants.

PENNSYLVANIA

I am enclosing order and have planned to visit you later in the month. We spent a beautiful day at your garden last Decoration Day. Many of the 19 plants which I got from you last year are now almost ready to bloom. They are all so vigorous and strong with no losses. Hope you have a good prosperous season.

NEW JERSEY

We visited your wonderful place last Sunday and saw these which I am ordering—a lovely trip, but my undoing. I am delighted with Pink Cameo and my Blue Shimmer from several years back is gorgeous this year.

NEW YORK

Our friends, my husband and I all felt that the trip was more than worth it to see your iris. It is a sight I won't forget and believe me we have been telling all our friends of your lovely gardens. We most certainly will be back next year.

PENNSYLVANIA

GUEST IRIS DISPLAY

We are trying out something new this year which will be of added interest to all visitors.

A special display bed has been established consisting of guest iris seedlings sent to us by hybridizers from Massachusetts, New Jersey, New York, Tennessee, Utah, California and Pennsylvania. These un-introduced varieties are on test here in order to determine their performance in this section of the country. Visitors will be given the opportunity to act as Iris judges—ballots will be furnished on which they can vote for the seedlings they think are the best. Results will be made known in our catalog next year.

IRIS AS A GIFT

If you have a friend, relative or good business customer interested in flower gardening, you would make them very happy by sending one of our numerous special Iris Collections as a gift. Donor's card will be enclosed with the shipment—either, one you send (no writing however except your signature on account of postal regulations) or one supplied by us showing your name. Each year more and more of these growing and lasting gifts are ordered by our customers. If a special date of delivery is desired, it is necessary to order at least two weeks in advance.
